DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 2 to 4 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 2,947,623 (Lincoln).

Lincoln discloses silver-base alloy compositions containing rhodium and copper in minor amounts that overlap applicants' claimed alloy elemental range limits. Lincoln states that the "impurity metals" are present in amounts ranging from 0.1 weight percent to less than 1 weight percent. The patent also acknowledges that greater amounts of "impurity metals" can be present in the silver-base alloys (e.g., about 1 weight percent of an additive metal), but the more highly-alloyed silver will not have the lowest possible rupture pressure characteristics. See line 56 in column 1 to line 30 in column 2. Prior art which teaches a range within, overlapping, or touching the claimed range anticipates if the prior art range discloses the claimed range with sufficient specificity. See MPEP 2131.03 and *Ex parte Lee*, 31 USPQ2d 1105 (Bd. Pat. App. & Inter. 1993).

Allowable Subject Matter

Claims 1 and 5 to 19 are allowed.
